

HERNIS 400 Compact

HERNIS 400 Compact

The HERNIS 400 Compact is developed to serve as the versatile centre of a medium sized CCTV System.

This system is scalable and it will be possible to connect up to 16 camera stations, 16 monitors and 8 keyboards. The central equipment is fitted within a small wall mounted rack. This allows larger flexibility in terms of where to locate the central unit.

The system will work together with any type of camera stations within the HERNIS product range. On the control side it will be possible to fit monitors of suitable size and operate the system from different types of keyboards.

Optional:

The HERNIS 400 Compact fitted in a slightly larger rack, can facilitate additional components such as:

- CPU – allows network communication
- QUAD – to display multiple images
- PIP – Picture in Picture
- DVR/VCR - recording

Features and Benefits:

- Matrix – instant access to high quality live video images
- Preset positions – for instant access to predefined viewpoints
- Sequence control – for virtual watch rounds
- Group switching – for different types of watch rounds
- Alarm integration – for immediate situation assessment
- Programmable text generator – to add information to the image about actual location

HERNIS 400 Compact Rack

The HERNIS 400 Compact cabinet measures only 600x800x400 mm. This handy cabinet will fit into space-restricted areas. It also includes the possibility to add functionalities using a PC and make it TCP/IP compatible if required.

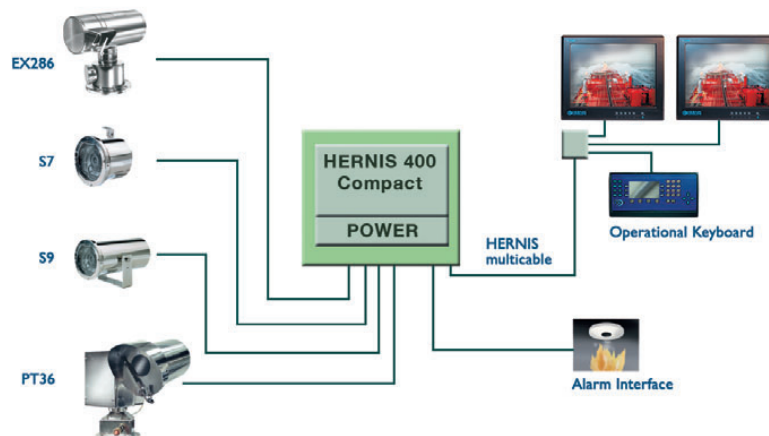

HERNIS Camera stations

HERNIS Scan Systems has a wide range of Camera Stations. The models intended for installation outdoor are certified to be either of explosion- or weatherproof type. All of them fitted in enclosures made of stainless steel and rated with a high ingress protection. The camera stations can be fitted with different camera sensors suitable for various purposes, such as a thermal camera for oil spill detection. There are also several models available for indoor use.

HERNIS Monitor and Keyboard

HERNIS can supply monitors of wide range of sizes based on different technologies suitable for different viewing requirements. Our own industrial type LCD monitor with excellent viewing angles is available in sizes of 15", 17" and 19". There is also a special Exp monitor with an integrated keyboard within our product range.
